R-67-2017

FACULTY OF SCIENCE

B.Sc. (First Year) (First Semester) EXAMINATION

MARCH/APRIL, 2017

(CBCS/CGPA)

BOTANY

Paper I (CCB-I)

(Diversity of Microbes)

(MCQ+Theory)

(Saturday, 1-4-2017)

Time : 10.00 a.m. to 12.00 noon

Time—2 Hours

Maximum Marks—40

N.B. :— (i) Attempt All questions.

(ii) All questions carry equal marks.

(iii) Use separate answer-sheet for MCQ (OMR sheet) and descriptive questions.

(iv) Time allowed to MCQ and to descriptive questions is 2.00 hours.

(v) Draw well labelled diagrams wherever necessary.

(MCQs)

1. Choose the correct answer of the following questions:

10

(i) Virology is the study of:

(a) Algae (b) Bacteria

(c) Europe (d) Virtuous

(ii) All viruses are entirely:

(a) Parasitic (b) Symbiotic

(c) Saprophytic (d) Epiphytic

(iii) The virus which kills the bacteria is called as

(c) Plant virus (d) Animal virus

(A) Bacteriophages (B) Nucleic acids

(c) **Bacteriophage**

(a) None of these

(iv) Conjugation was first discovered by :

(a) Koch (b) Tatum

(c) Lederberg (d) Lederberg and Tatum

(v) Nostoc is :

(a) Myxobacteria (b) Archebacteria

(c) Cyanobacteria (d) Bacillus

(vi) Eurotium belongs to class :

(a) Oomycetes (b) Ascomycetes

(c) Basidiomycetes (d) Deuteromycetes

(vii) Fungi growing on dead and decaying organic matter are called :

(a) Saprophytic (b) Parasitic

(c) Epiphytic (d) Endophytic

(viii) Peculiar dual organism is :

(a) Bacteria (b) Fungi

(c) Lichen (d) Virus

(ix) Rusts caused by :

(a) Alternaria (b) Eurotium

(c) Puccinia (d) Bacteria

(x) Lichen is the association of :

(a) Algae and Bacteria (b) Fungi and Bacteria

(c) Algae and Fungi (d) Virus and Bacteria

(Theory)

2. Describe the ultrastructure of bacteria cell.

10

Describe in brief :

Or

(a) Yellow vein mosaic of Bhindi.

(b) Classification of viruses based on host.

3. Describe the structure of mycelium and asexual reproduction of Albugo. 10
Or

Describe in brief :

- (a) Role of Fungi in industries
- (b) Asexual reproduction in Eurotium

4. Describe the structure of mycelium and reproduction of alternaria. 10
Or

Describe in brief :

- (a) Economic importance of Lichen
- (b) Pyenidial stage of puccinia.

FACULTY OF SCIENCE

B.Sc. (First Year) (First Semester) EXAMINATION

OCTOBER/NOVEMBER, 2018

(CBCS/CGPA Pattern)

BOTANY

Paper I

(Diversity of Microbes)

(MCQ & Theory)

(Wednesday, 17-10-2018)

Time : 10.00 a.m. to 12.00 noon

Time—2 Hours

Maximum Marks—40

- N.B.* — (i) Attempt *All* questions.
 (ii) *All* questions carry equal marks.
 (iii) Use separate answer-sheet for MCQ (OMR-sheet) and descriptive questions.
 (iv) Draw a well labelled diagrams wherever necessary.

MCQ

1. (i) Viruses are :
(a) Saprophytes (b) Obligate parasites
(c) Symbiotic (d) Facultative parasites

(ii) Little leaf of brinjal is caused by :
(a) Fungi (b) Bacteria
(c) Virus (d) Mycoplasma

(iii) Prions cause disease :
(a) Mad cow (b) Bean mosaic
(c) Little leaf of brinjal (d) Ergot

P.T.O.

Theory

2. Describe the structure of TMV and add a note on transmission of viruses.

8

Write in brief :

- (a) Archaebacteria
 - (b) Bean mosaic

WT

(3)

W—72—2018

3. Describe the ultrastructure of bacterial cell.

Or

Write in short :

- (a) Cleistothecium
- (b) Uredial stage of puccinia.

4. Describe the structure of mycelium and reproduction in Alternaria.

Or

Describe in brief :

- (a) Economic importance of Lichens
- (b) Structure of Mycelium of Albugo.

This emission paper contains 1 printed page

FACULTY OF SCIENCE AND TECHNOLOGY

**B.Sc. (First Year) (First Semester) (Regular) EXAMINATION
OCTOBER/NOVEMBER, 2019**

(New Course)

BOTANY

Paper-II

(Plant Ecology, Phytogeography and Environmental Biology)

(Friday, 18-10-2019)

Time : 10.00 a.m. to 12.00 noon

卷之三

Maximum Marks—40

N.S. (v) Answer All questions.

(ii) Illustrate your answers with suitable labelled diagrams wherever necessary.

- Q. Define soil. Give an account on soil formation.

15

1

Write short notes on :

2. Describe the T.S. of *Hydrilla* stem. Enlist the Adaptations of Ecological interest. 15

1

Write short notes on :

3. Write short notes on (any two):

- (a) Soil moisture
 - (b) General characters of Halophytes
 - (c) Food chain
 - (d) Afforestation.

FACULTY OF SCIENCE

B.Sc. (First Year) (First Semester) (Backlog) EXAMINATION

OCTOBER/NOVEMBER, 2019

(CBCS/CGPA Pattern)

BOTANY

Paper I

(Diversity of Microbes)

(MCQ & Theory)

(Monday, 18-11-2019)

Time : 10.00 a.m. to 12.00 noon

Time—2 Hours

Maximum Marks—40

- N.B. :—** (i) Attempt all questions.
(ii) All questions carry equal marks.
(iii) Use separate answer sheet for MCQs (OMR) and descriptive questions.
(iv) Draw well labelled diagrams wherever necessary.

MCQ

1. Multiple Choice Questions : 10
- (i) Virology is the study of.....
(a) Bacteria (b) Fungi
(c) Viruses (d) Algae
- (ii) Yellow vein mosaic disease of bhendi is caused by.....
(a) Phascolus Virus-I (b) Hibiscus Virus-I
(c) Bacterial Virus (d) Mycoplasma
- (iii)is the most common method of a sexual reproduction in bacteria.
(a) Budding (b) Binary Fission
(c) Endospore Formation (d) Conjugation

P.T.O.

- (iv) In *E.coli*, DNA is.....
(a) Circular (b) Triangular
(c) Linear (d) Rectangular

(v) Albugo belongs to class.....
(a) Ascomycetes (b) Oomycetes
(c) Deuteromycetes (d) Basidiomycetes

(vi) Most of the fungal cell wall contain.....
(a) Chitin (b) Pectin
(c) Protein (d) Starch

(vii) Arrangement of conidia in Eurotium is.....
(a) Acropetal (b) Irregular
(c) Peripheral (d) Basipetal

(viii) Rust is caused by.....
(a) Albugo (b) Puccinia
(c) Eurotium (d) Alternaria

(ix) Which of the following is called imperfect fungi ?
(a) Albugo (b) Eurotium
(c) Puccinia (d) Alternaria

(x) Lichen is an association of.....
(a) Algae and Bacteria (b) Algae and Virus
(c) Algae and Fungi (d) Bacteria and Fungi

Theory

2. Describe the structure of TMV and transmission of viruses.

10

Or

Describe in brief :

- (a) Mode of nutrition in bacteria. 5
(b) Classification of viruses on the basis of host. 5

WT

(3)

Y-83-2019

3. Describe the ultra-structure of bacterial cell. 10

Or

Describe in brief :

(a) Telial stage in Puccinia. 5

(b) Sexual reproduction in Albugo. 5

4. Describe the structure of mycelium and reproduction in Alternaria. 10

Or

Describe in brief :

(a) Role of Fungi in Industries. 5

(b) Economic importance of Lichens. 5

Name of Examination: Winter Examination 2020			
Name of subject	Zoology		
Subject code:	B.Sc. I/Cluster Code 117		
(As per examination time table)			
Class:	B.Sc. First Year	Semester	I
Paper title and paper no.	Paper I: Biodiversity of Invertebrates		
(As per examination time table)			
Time:	01 hour	Maximum Marks	40

N.B. (1) All questions are compulsory.

(2) All questions carry equal marks

(3) Attempt all the questions

1. Protozoa are also called
 - a procellular
 - b multicellular
 - c acellular
 - d prokaryote
2. The presence of two types of nuclei, a macro-nucleus and a micronucleus is characteristic of protozoans are grouped under the class:
 - a Flagellata
 - b Sporozoa
 - c Sarcodina
 - d Ciliata
3. The main function of the contractile vacuole is:
 - a chlorophyll production.
 - b synthesis of carbohydrate.
 - c eliminating excess water
 - d to be a photoreceptor to detect light
4. The main basis of classification of protozoa is:
 - a Size
 - b Shape
 - c Locomotory organs
 - d Number of nuclei
5. Class of phylum protozoa move via pseudopodia.
 - a Rhizopoda
 - b ciliate
 - c flagellate
 - d sporozoa
6. In Euglena locomotion by
 - a Cilia
 - b Flagella
 - c Pseudopodia(d) Myonemes
7. In which class of Protozoa, the locomotory organelles absent:
 - a Rhizopoda
 - b Ciliate
 - c Sporozoan(d) Mastigophora
8. Plasmodium is the causative agent of malaria which was discovered by:
 - a Laveran
 - b Ross
 - c Golgi
 - d Lamble
9. Malarial parasite is transmitted by.....
 - a Male anopheles
 - b Male culex
 - c House fly
 - d Female anopheles
10. Poriferous are:
 - a pore bearing animals
 - b unicellular organisms
 - c parasitic organisms
 - d metamerically segmented organism
11. Body wall in Coelenterate is.....
 - a Diploblastic
 - b Triploblastic
 - c Single layered
 - d Polyblastic

12. Phylum Cnidaria (coelenterata) is divided into classes Hydrozoa, Scyphozoa and
a) Anthozoa b) Metazoa c) Protozoa d) Sipmatozoa
13. Exoskeleton of corals consist of?
a) Calcium sulphate b) Calcium carbonate c) Sodium sulphate d) Calcium aluminate
14. Polymorphism occurs in animals of the class.
a) Hydrozoa b) Anthozoa c) Scyphozoa d) Gastropoda
15. Platyhelminthes are generally called.....
a) Flat worms b) Round worms c) Tubiculus worms d) Blind worms
16. Which system is best developed in Helminthes?
a) Neuro-sensory system b) Reproductive system c) Digestive system d) Respiratory system
17. Flame cell is typical of:
a) Annelida b) Chordata c) Porifera d) Platyhelminthes
18. Non parasitic, free living flatworms belong to the class:
a) Trematoda b) Cestoda c) Turbellaria d) nematoda
19. Primary host and secondary host of Taenia are & Respectively.
a) Man, sheep b) Sheep, snail c) Man, pig d) Pig, man
20. Ascaris is.....
a) Free living b) Ectoparasite c) Endoparasite d) Commensal
21. Which one of these is the primary characteristic of phylum annelida?
a) Trochophore larva in life cycle b) Metameric segmentation
c) Excretion by flame cells d) Body covered by ciliated epidermis
22. True coelom appeared first in the course of evolution in:
a) Echinodermata b) Annelida c) Chordata d) Aschelminthes
23. Parapodia are locomotory organs in Neries which belong to the class:
a) Hirudinea b) Oligochaeta c) Polycheta d) Arachnannelida
24. Earthworm belongs to the class:
a) Polychaeta b) Oligochaeta c) Hirudinea d) All of the above
25. Which one is known as Nature's plough man
a) Nereis b) Cattle leech c) Earthworm d) Polygordius
26. Phylum arthropoda is characterized by:
a) Green gland b) Unjointed appendages c) Jointed appendages d) Protopodite
27. Which of the following phyla has the largest number of species
a) Annelida b) Arthropoda c) Coelenterata d) Echinodermata

28. In cockroach, the first pair of wings are called:
a) Sterna b) Terga c) Tegmina d) Halteres
29. In digestive system of cockroach grinding machine is:
a) Crop b) Mandible c) Gizzard d) Maxilla
30. Study of insects is known as:
a) Parasitology b) Entomology c) Acarology d) Helminthology
31. Animals having soft body, mantle and shell belong to phylum:
a) Annelida b) Echinodermata c) Mollusca d) Arthropoda
32. Mode of respiration in mollusca is:
a) Cutaneous b) Branchial c) Pulmonary d) All of the above
33. Oysters that produce pearls belong to the class:
a) Cephalopoda b) Gastropoda c) Scaphopoda d) Pelecypoda
34. Molluscan shells are used in :
a) Poultry feed
b) Making roads
c) Cradles
d) All of the above
35. Spiny skin, exclusively marine habitat and non-parasitic nature are features of:
a) Annelida b) Echinodermata c) Hemichordate d) Coelenterata
36. The characteristic feature of echinoderms is the possession of:
a) water vascular system b) Canal system c) Haemal d) None of the above
37. The locomotory organs of Echinoderms are called:
a) Parapodia b) Pseudopodia c) Tube feet d) Setae
38. The surface having mouth of starfish directed towards the substratum is called as:
a) Aboral b) Abactinal c) Oral d) dorsal
39. Which group of animal is known as invertebrate chordates:
a) Echinodermata b) Hemichordate c) Arthropoda d) All of the above
40. Balanoglossus shows affinity with chordates as it has type of coelom:
a) Enterocoelous b) Pseudocoelom c) Schizocoelom d) None of the above

FACULTY OF SCIENCE
Class: B.Sc. I Year (SEM I)
Examination: Winter 2020
Subject: Botany

Title of Paper: Virus, Bacteria, Algae, Fungi, Lichens & Mycorrhiza

Paper No.: I

Cluster code: SD

10f011

Date : 09/04/2021

Time : One Hour

Maximum Marks : 40

N.B. -

- (i) One mark to each correctly answered MCQ
- (ii) No Negative marking system is applicable
- (iii) Darken only one circle for the answer of MCQ
- (iv) Use black ball pen to darken the circle of correct choice

1) Viruses are _____

- A) Obligate parasite B) Saprotophytes C) Facultative saprophyte D) None of the above

2) The symptom produced by viruses is _____

- A) Rust B) Canker C) Mosaic D) Mildews

3) TMV contains _____ as nucleic acid

- A) DNA B) RNA C) Both A & B D) None of the above

4) Capsid is composed of many similar small protein units called as _____

- A) Capsomere B) Nucleic acid C) Histone D) None of the above

5) Yellow vein mosaic of bhindi is caused by _____

- A) Phaseolus virus B) Hibiscus virus-I C) Poyvirus D) None of the above

6) Bacteria are primitive _____ organisms

- A) Prokaryotic B) Eukaryotic C) Monokaryotic D) None of the above

7) Splitting of bacterial cell into two daughter cells is called as _____

- A) Conjugation B) Binary fission C) Transduction D) Transformation

8) The principal structural component of bacterial cell is _____

- A) Peptidoglycan B) Protein C) Carbohydrate D) Lipid

9) Citrus canker is caused by

- A) *Bacillus subtilis* B) *Pseudomonas fluorescence* C) *Xanthomonas citri* D) None of the above

10) _____ is the process by which one bacterium transfers genetic material to another through direct contact.

- A) Conjugation B) Binary fission C) Transduction D) Transformation

- 11) Phycology is the study of _____
A) Algae B) Fungi C) Lichen D) *Mycoplasma*
- 12) Rhodophyceae is a class of _____ algae
A) Green B) Brown C) Red D) Yellow-green
- 13) Cap cells is the characteristic of _____
A) *Oedogonium* B) *Chara* C) *Ectocarpus* D) None of the above
- 14) Sexual reproduction in *Oedogonium* is _____
A) Isogamous B) Anisogamous C) Oogamous D) All of the above
- 15) Chloroplast in *Oedogonium* is _____
A) Spiral B) Reticulated C) Cup shaped D) Star shaped
- 16) *Nostoc* is enveloped by _____
A) Jacket layer B) Cover cells C) Gelatinous sheath D) Peridium
- 17) In *Nostoc* filament colourless, thick walled, empty looking cell are present between the vegetative cells are called as _____
A) Heterocyst B) Akinetes C) Hormogonia D) None of the above
- 18) *Ectocarpus* is the member of class _____
A) Chlorophyceae B) Phaeophyceae C) Rhodophyceae D) Xanthophyceae
- 19) Plurilocular sporangia are concerned with _____ reproduction
A) Asexual B) Sexual C) Both A & B D) None of the above
- 20) Agar- agar is obtained from _____
A) *Gelidium* B) *Nostoc* C) *Oedogonium* D) None of the above
- 21) Fungi growing on dead and decaying organic matter are called as _____
A) Parasites B) Saprobes C) Obligate parasites D) Autotrophs
- 22) Fungal cell wall is made up of _____
A) Chitin B) Cellulose C) Glycogen D) Peptidoglycan
- 23) *Penicillium* belongs to _____
A) Basidiomycetes B) Ascomycetes C) Deuteromycetes D) Phycomycetes
- 24) Number of ascospores formed in each ascus of *Penicillium* is
A) 4 B) 8 C) 12 D) 16
- 25) *Alternaria* causes _____ disease in plants
A) Leaf spot B) Rust C) canker D) smut

- 26) Sexual reproduction is absent in _____
A) *Alternaria* B) *Allugo* C) *Penicillium* D) *Agaricus*
- 27) The sexual reproduction in *Agaricus* takes place by _____
A) Oogamous B) Isogamous C) Anisogamous D) Homogamous
- 28) The fruiting body of *Agaricus* is called as _____
A) Basidiocarp B) Ascocarp C) Cleistothecium D) None of the above
- 29) *Penicillium* is used in the production of _____
A) Antibiotic B) Cheese fermentation C) Both A & B D) None of the above
- 30) One of fungi used as food from following is _____
A) *Agaricus* B) *Allugo* C) *Penicillium* D) *Aspergillus*
- 31) The algal partner in lichen is called as _____
A) Lycobiont B) Phycobiont C) Mycobiont D) None of the above
- 32) The fungal partner in lichen is called as _____
A) Lycobiont B) Phycobiont C) Mycobiont D) None of the above
- 33) _____ are the forms of Lichen
A) Crustose B) Foliose C) Fruticose D) All of the above
- 34) *Usnea* is a _____ lichen
A) Crustose B) Foliose C) Fruticose D) None of the above
- 35) Which of the following is the indicator of atmospheric pollution?
A) Algae B) Bacteria C) Lichen D) None of the above
- 36) _____ is a symbiotic association between a green plant and a fungus
A) Mycorrhiza B) Lichen C) Bacteria D) None of the above
- 37) _____ fungi are that they penetrate the cells in the root cortex and form Arbuscules and Vesicles
A) Ectomycorrhiza B) Endomycorrhiza C) Both A & B D) None of the above
- 38) The ectomycorrhiza are also called as _____
A) Hartig Net B) VAM C) Arbuscule D) None of the above
- 39) The advantage of plant with mycorrhizal association is _____
A) Food B) Protection C) Increase absorption of minerals D) None of the above
- 40) The fungal partner in VAM belongs to the class _____
A) Basidiomycetes B) Ascomycetes C) Glomeromycetes D) All of the above

12:00 to 1:00

Name of Examination: Winter Examination 2020			
Name of subject	Zoology		
Cluster code:	117		
(As per examination time table)			
Class:	B.Sc. First Year	Semester	I
Paper title and paper no.		Paper II: Biodiversity of Chordates	
(As per examination time table)			
Time:	01 Hour	Maximum Marks:	40

N.B. (1) Attempt all questions.

(2) All question Carry equal marks.

(3) Use OMR Answer sheet.

- Prime diagnostic feature of phylum chordate is _____
A) Gill slits B) Larynx C) Dorsal ventral cord D) Notochord
- The primary function of the notochord is
A) sensory B) digestive C) support D) respiration
- Heart of vertebrate is
A) dorsal, muscular B)dorsal, skeletal C)ventral, muscular D) ventral, skeletal
- In Urochordata notochord is found in
A) Head of adult B) Tail of adult C) Tail of larva D) Test of adult
- Herdmania belongs to sub phylum _____
A)HemichordateB) Urochordata C) Pisces D) Gnathostomata
- The position of notochord in Cephalochordates _____
A) Extended from posterior end to anterior end B)Confined to head only
C) Confined to tail only D) None of the above.
- The following is a cephalochordate animal:
A) Ranna B) Salpa C) Amphioxus D) None of the above
- Agnatha is characterized by absence of _____
A)ExoskeletonB) Endoskeleton C) Jaws D) Head
- Petromyzon belongs to class _____.
A) Chondrichthyes B)OsteichthyesC) Cyclostomata D) Tunicate
- Characteristic feature of Cyclostomata is _____
A) Round mouth B) Ventral mouth C) Terminal mouth D) None of the above
- Which of the following is the correct taxonomy for fishes?
A) Kingdom Animalia, Phylum Chordata, Subphylum Vertebrata
B) Kingdom Animalia, Phylum Chordata, Subphylum Urochordata
C) Kingdom Animalia, Phylum Vertebrata, Subphylum Chordata
D) Kingdom Animalia, Phylum Chordata, Subphylum Pisces
- Cartilaginous fishes are characterized by the presence of _____
A) placoid B) cycloid C) ctenoid D) ganoid

13. Scoliodon is _____.
A) Marine, herbivorous B) Fresh water, carnivorous
C) Marine, carnivorous & predator D) Fresh water, omnivorous.
14. Tail of Scoliodon is _____.
A) Homocercal B) Heterocercal C) Hypocercal D) Hypercercal
15. Scroll valve involved in _____.
A) absorption B) digestion C) assimilation D) ejection
16. Viviparous fish is _____.
A) Dog fish B) Catla C) Mrigal D) Rohu
17. Which is limbless amphibian _____.
A) Ichthyophis B) amphiuma C) necturus D) Hyla
18. First tetrapodes are _____.
A) Reptiles B) Birds C) Mammals D) Amphibia
19. Amphibians are characterized by _____.
A) Absence of scales B) Absence of Fins C) Absence of Operculum D) All of the above
20. Summer sleep of frog is known as _____.
A) Aestivation B) Hibernation C) Paedogenesis D) Neoteny
21. The largest Indian poisonous snake is _____.
A) Blue Krait B) Cobra C) King Cobra D) Python
22. Study of snakes is called
A) Ichthyology B) Serpentology C) Herpetology D) Entomology
23. Krait (Bungarus) can be differentiated from another snake by its....
A) Hairy body B) Size C) Shield like scales on the head D) Vertebral scales
24. Study of reptiles is called as _____.
A) Ichthyology B) Herpetology C) Osteology D) Ornithology
25. Venom of Naja naja is _____.
A) Neurotoxic B) Haemotoxic C) Both A and B D) None of the above
26. Aves are characterized by _____.
A) Pneumatic bones B) Solid bones C) Both A and B D) None of the Above
27. Birds are _____ animals.
A) Cold blooded B) warm blooded C) chilled blooded D) None of the Above
28. Birds do not have _____.
A) Urinary bladder B) Swim bladder C) teeth D) All of the above

29. The study of birds is called
A) Ichthyology B) Herpetology C) Ornithology D) aviology

30. In birds, one is functional:
A) Right ovary B) Left ovary C) Kidney D) None of the above

31. Body of mammals is covered by _____
A) Scales B) Skin C) Hair D) Horn

32. Example of marsupilia is _____
A) Horse B) Rabbit C) Elephant D) Kangaroo

33. The body cavity of mammals is divided into two parts with the help of _____.
A) Ileum B) Ischium C) Diaphragm D) Liver

34. Flying mammals are included
A) Rodentia B) Chiroptera C) Primates D) Cetacean

35. The body of Rat is divisible into _____
A) Head, neck, trunk and tail B) Head, neck and trunk
C) Head, neck and tail D) Head and trunk

36. Rectum is a part of:
A) Intestine B) Testis C) Heart D) Stomach

37. The right lung of rat is divided into _____ lobes.
A) Two B) Three C) Four D) Six

38. Heart of rat is _____.
A) Two chambered B) Three chambered C) Four chambered D) None of the above

39. The formation of image in dim light is due to
A) Rod cells B) Cone cells C) Olfactory cell D) Prokaryotic cell

40. Internal ear of rat is called as:
A) Membranous labyrinth B) Pericardial membrane C) Pleural membrane D) Plasma membrane

SB—42—2022

FACULTY OF SCIENCE

B.Sc. (First Year) (First Semester) EXAMINATION

MAY/JUNE, 2022

(New Pattern)

BOTANY

Paper-I

(Viruses, Bacteria Algae, Fungi, Lichens and Mycorrhiza)

(Saturday, 11-06-2022)

Time : 10.00 a.m. to 12.30 p.m.

Time— 2.30 Hours

Maximum Marks—40

N.B. :— Attempt all questions.

1. Describe in detail replication/multiplication of Viruses.

Or

Write in brief :

- (a) Asexual reproduction by zoospore formation in Oedogonium.
(b) Reproduction in Nostoc.

2. Describe in detail Asexual reproduction in Penicillium.

Or

Write in brief :

- (a) Asexual reproduction in Alternaria.
(b) Types of Lichen.

3. Write short notes on (any two) :

- (a) Economic importance of Viruses
(b) Economic importance of Algae
(c) Basidiocarp in Agaricus
(d) Mycorrhiza.

This question paper contains 3 printed pages.

MARCH/APRIL 2017

(CBCS/CGPA Pattern)

BOTANY

Paper II (CCB-I)

(Cell and Molecular Biology)

(MCQ+Theory)

(Wednesday, 5-4-2017)

Time : 10.00 a.m. to 12.00 noon

Time—2 Hours

Maximum Marks—40

N.B. :-

- (i) Attempt All questions.
- (ii) All questions carry equal marks.
- (iii) Use separate answer-sheet for MCQ (OMR sheet) and descriptive questions.
- (iv) Draw well labelled diagrams wherever necessary.

(MCO₂)

1. Choose the *correct* answer of the following questions : 10

(i) The packaging and transport of proteins in eukaryotic cells is done by :

 - (a) Nucleus
 - (b) Ribosomes
 - (c) Golgi bodies
 - (d) Lysosomes

(ii) The hydrolytic enzymes are present in :

 - (a) E.R.
 - (b) Ribosomes
 - (c) Golgi bodies
 - (d) Lysosomes

(iii) The longest stage in cell cycle is :

 - (a) G₁
 - (b) S
 - (c) G₂
 - (d) M

P.T.O.

WT

(3)

0 - 00 - 000

(Theory)

2. Describe the ultrastructures of prokaryotic cell.

10

Or

Describe in brief :

(a) Ribosomes

5

(b) Sickle cell anemia

5

3. Describe the process of mitosis cell division.

10

Or

Describe in brief :

(a) Spontaneous mutation

5

(b) Fine structure of gene.

5

4. Describe composition of DNA and elaborate Meselson and Stahl *experiment* of semiconservative replication of DNA.

10

Or

Describe in brief :

(a) Polytene chromosome

5

(b) t-RNA.

BOTANY

Paper I

(Viruses, Bacteria, Algae, Fungi, Lichens and Mycorrhiza)

(Friday, 18-10-2019)

Time : 10.00 a.m. to 12.00 noon

Time—2 Hours

Maximum Marks—40

- N.B. :— (i) Attempt All questions.
(ii) Illustrate your answers with suitably labelled diagrams wherever necessary.

1. Describe ultrastructure of bacterial cell and add a note on binary fission. 15

Or

Write notes on :

- (a) Structure of basidiocarp in Agaricus 8
(b) Classification of fungi by Alexopolous and Mims. 7
2. Describe the thallus structure of Oedogonium and add a note on asexual reproduction in Oedogonium. 15

Or

Write notes on :

- (a) Types of Lichen 8
(b) General characters of mycorrhiza. 7

P.T.O.

WP

(2)

X-35-2019

3. Attempt any two of the four :

- (a) Economic importance of viruses
- (b) Structure of *Nostoc filament*
- (c) Nutrition in fungi
- (d) Economic importance of *Lichens*.

Paper II

(Cell and Molecular Biology)

(MCQ & Theory)

(Saturday, 20-10-2018)

Time : 10.00 a.m. to 12.00 noon

Time—2 Hours

Maximum Marks—10

N.B. :-

- (i) Attempt All questions.
- (ii) All questions carry equal marks.
- (iii) Use separate answer-sheet for MCQs (OMR sheet) and descriptive questions.
- (iv) Draw well labelled diagrams wherever necessary.

MCE

1. Choose the *correct* answer of the following questions : 10

 - Eukaryotic cell differs from prokaryotic cell in having :
 - Ribosomes
 - Plasma membrane
 - True nucleus
 - Nucleolus
 - Lysosomes were first reported by :
 - Flemming
 - Porter
 - Robert Brown
 - de Dave
 - Diagrammatic representation of Karyotype is called as :
 - Idiogram
 - Phenogram
 - Histogram
 - Cardiogram

PTO

- (iv) Nuclear membrane disappears in :
- | | |
|--------------------|-------------------|
| (a) Early prophase | (b) Late prophase |
| (c) Metaphase | (d) Anaphase |
- (v) During cell division, the spindle fibres are attached to of the chromosomes.
- | | |
|----------------|------------------|
| (a) Centromere | (b) Chromatids |
| (c) Chromomere | (d) Chromonemata |
- (vi) A complex formed by deoxyribose sugar, phosphoric acid and nitrogen base is :
- | | |
|----------------|-----------------|
| (a) Nucleoside | (b) Polypeptide |
| (c) Nucleotide | (d) Amino acids |
- (vii) DNA does not contain :
- | | |
|-------------|-------------|
| (a) Adenine | (b) Guanine |
| (c) Thymine | (d) Uracil |
- (viii) The function of t-RNA is :
- | |
|-----------------------------|
| (a) To carry Amino Acids |
| (b) Production of m-RNA |
| (c) Synthesis of r-RNA |
| (d) Production of Ribosomes |
- (ix) S. Benzer classified genes into :
- | | |
|-------------|------------------|
| (a) Cistron | (b) Muton |
| (c) Recon | (d) All of these |
- (x) The term mutation was coined by :
- | | |
|------------------|------------------|
| (a) Hugo DeVries | (b) G.J. Mendel |
| (c) T.H. Morgan | (d) H.G. Khorana |

(Thursday, 19-12-2019)

Time : 10.00 a.m. to 12.00 noon

Time—2 Hours

Maximum Marks—40

- N.B. :—**
- (i) Attempt all questions.
 - (ii) All questions carry equal marks.
 - (iii) Draw well labelled diagrams wherever necessary.

MCQ

1. Choose correct answer of the following questions : 10
 - (i) In prokaryotic cell, genetic material is :
 - (a) Nucleoid
 - (b) Centrosome
 - (c) Nucleolus
 - (d) Cytoplasm
 - (ii) The main controlling centre of the cell is :
 - (a) Nucleolus
 - (b) Nucleus
 - (c) Lysosomes
 - (d) Ribosomes
 - (iii) The lamp brush chromosomes occurred in the oocytes of which stage :
 - (a) Leptotene
 - (b) Zygote
 - (c) Pachytene
 - (d) Diplotene

P.T.O.

- (iv) In prophase-I of meiosis, synapsis occurs during :

 - (a) Leptotene
 - (b) Pachytene
 - (c) Zygote
 - (d) Diplotene

(v) The correct sequence of cell cycle is :

 - (a) G₁, S, M, G₂
 - (b) S, M, G₁, G₂
 - (c) M, S, G₂, G₁
 - (d) G₁, S, G₂, M.

(vi) In RNA, thymine is replaced by :

 - (a) Uracil
 - (b) Guanine
 - (c) Adenine
 - (d) Cytosine.

(vii) In DNA, the complementary base pairing is :

 - (a) A = T, G = C
 - (b) T = A, C = G
 - (c) A = U, G = C
 - (d) A = U, C = G

(viii) A sequence of three unpaired nitrogen base on t-RNA is called as :

 - (a) Codon
 - (b) Anticodon
 - (c) Stop codon
 - (d) Initiation codon

(ix) In children, phenylketonuria disease caused by the absence of enzyme :

 - (a) Homogentisate oxydase
 - (b) Polymerase
 - (c) Phenyl alanine hydroxylase
 - (d) Ligase.

(x) The detection of genetic abnormalities during the pregnancy is known as :

 - (a) Sickle cell anemia
 - (b) Phenyl Ketomuria
 - (c) Albinism
 - (d) Amniocentesis

WT

(3)

Maximum Market

- Time: One Hour**

 - i) Attempt all questions.
 - ii) All question carry equal marks.
 - iii) Choose most appropriate answer from given alternatives.
 - iv) Negative marking system is not applicable.

31. Cuticular epidermis is found in-
a)Xerophytes b)Mesophytes
c)Hydophytes d)Halophytes
32. Smoke causes _____ pollution
a)Water b)Soil
c)Noise d)Air
33. Sewage contains pathogenic _____
a)Fungi b)Bacteria
c)Virues d)Mycoplasma
34. Large air cavities are found in T.S. of _____ stem
a)Nerium b)Hydrilla
c)Casuarina d)none of these
35. Cholera, typhoid etc. are caused by-
a)Air b)Water
c)Noise d) Soil
36. The carbon monoxide of vehicles are the source of
a)Warer pollution b)Soil Pollution
c)Air Pollution d) Noise Pollution
37. Deforestation is mainly caused by-
a)Over population b)Industrialization
c)Urbanization d)all of these
38. In ecosystem soil is the _____ component
a)Biotic b)Abiotic
c)Both a & b d)None of these
39. The largest Bio-diversity spot in India is-
a)Western Ghat b)Indo Burma
c)Himalayas d)Sundaland
40. Casuarina is a Classical example of-
a)Hydrophytes b)Mesophytes
c)Halophytes d)Xerophytes

Maximum Marks—40

Time—Two Hours

- N.B. :— (i) Attempt all questions.
(ii) All questions carry equal marks.
(iii) Draw well labelled diagram wherever necessary.

MCQ

1. (i) is regarded as 'Father of Genetics'. 10
(a) Bateson (b) Morgan
(c) Watson (d) Mendel
(ii) Genetic constitution of an organism is called as
(a) inheritance (b) genotype
(c) phenotype (d) heredity
(iii) Dihybrid test cross ratio is
(a) 1 : 1 (b) 9 : 3 : 3 : 1
(c) 1 : 1 : 1 : 1 (d) 3 : 1

P.T.O.

- (iv) Sex linked characters include

 - (a) Colourblindness
 - (b) Hypertrichosis
 - (c) Haemophilia
 - (d) All of these

(v) Nullisomy is

 - (a) $2n - 2$
 - (b) $2n + 2$
 - (c) $2n - 1 - 1$
 - (d) $2n + 1 + 1$

(vi) Webbed neck and gonadal dysfunction is found in syndrome.

 - (a) Down
 - (b) Klinefelter
 - (c) Turner
 - (d) Patau

(vii) Emasculation, bagging, labelling are the steps involved in

 - (a) Selection
 - (b) Hybridization
 - (c) Mutation
 - (d) Introduction

(viii) The main objective of plant breeding is to

 - (a) Produce disease and pest resistance
 - (b) Produce high yielding varieties
 - (c) Both of the above
 - (d) None of the above

(ix) The substance used to induce mutation is called

 - (a) Oncogen
 - (b) Nitrogen
 - (c) Teratogen
 - (d) Mutagen

(x) Introducing plant in a new locality is called

 - (a) Introduction
 - (b) Selection
 - (c) Hybridization
